Organic

Organic screens have a clean, frameless design that can be personalized through a variety of colour or shape options.

Available as tackable privacy screens (above the work surface) or as privacy/modesty screens (above & below the work surface), both options share the same thin profile and clean, frameless design.

Fly-by Screens can attach to tables, desks, or other work surfaces to provide visual privacy below the work surface. Screens are available in a variety of widths, colours and shapes.

- 25mm wide
- 30mm bevelled radii to all corners
- Manufactured from solid core bonded material
- Desk-up (DU), Fly-by (FB) & Floorstanding (FS) versions available
